

# Worksheet 6. Application Summary

This worksheet will be posted on the web to notify the public of requests for critical use exemptions beyond the 2005 phase out for methyl bromide. Therefore, this worksheet cannot be claimed as CBI.

1. Name of Applicant: Georgia Fruit and Vegetable Growers Association

2. Location: Georgia

3. Crop: Eggplant

4. Pounds of Methyl Bromide Requested 2005 107736

5. Area Treated with Methyl Bromide 2005 804 acres units

6. If methyl bromide is requested for additional years, reason for request:

There are currently no alternatives to methyl bromide for control of our target pests and there is no indication that a suitable alternative can be identified before 2006 or 2007.

2006 107736 lbs. Area Treated 804 acres units

2007 107736 lbs. Area Treated 804 acres units

Place an "X" in the column(s) labeled "Not Technically Feasible" and/or "Not Economically Feasible" where appropriate. Use the "Reasons" column to describe why the potential alternative is not feasible.

Potential Alternatives	Not Technically Feasible	Not Economically Feasible	Reasons
Grafting, Resistant Rootstock, Plant Breeding	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Organic Ammendments/Compost	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Flooding and Water Management	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Substrates	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Solarization	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
Resistant Cultivars	X		The alternative has no effect on control of Cyperus species (nutsedge), which is a major pest for these crops.
